AROUND *the* TOWNSHIP

With the live committee of Ray Truscott, A. L. Silva and Joe Machado in charge, the Junior Chamber of Commerce at Newark is moving rapidly toward active sponsorship of a troop of Boy Scouts. Plans are now taking shape for opening a series of meetings at which volunteer committeemen and the tentative Scoutmaster will receive the training necessary to prepare them for the conduct of Scouting with the start of school term in the fall. The first of these meetings is expected to be called almost at once.

Thus begins a splendid undertaking by a splendid organized group.

Niles has been entertaining a celebrity unawares.

Henry B. Wallace of Washington, D. C., has been employed at the Kimber Poultry Breeding Plant for the past month and after a week end trip to Yosemite Valley, will return to spend August here.

He obtained the position at the request of his father who wrote John Kimber, owner, that the plant is recognized as one of the outstanding scientific poultry breeding plants in the country. Wallace's son is specializing in genetics and agronomy at Iowa State College.

The late Henry C. Wallace, father of "A." and grandfather of "B." was Secretary of Agriculture under President Coolidge.

Echoes still are being heard of the good time had by all at the Alameda and Contra Costa Counties Farm Home Department vacation camp at Yosemite during the last week in June attended by 148 women.

"We home women had a real vacation from all home duties," is the concensus of opinion expressed on every hand.

The flare of a conflagration on Sunday night to the northeast of Centerville that attracted the attention of a good many residents of the township was harmless. Brush was fired along Alameda Creek and was allowed to burn out. Three fire departments were on the job, although none of the apparatus was taken to the scene—just in case. They were Centerville, Niles and Decoto departments.

Right in the middle of summer, when organizations are disbanding rather than organizing the Southern Alameda County Music Association has been brought into being and now in a few short weeks is a going concern.

Rehearsals of band and orchestra and chorus have progressed with splendid attendances, until at least one of these groups—the band of 40 pieces—announces it will be ready for its first public appearance within a month.

John Kimber, first president of the association, gets our hearty congratulations on achievement to date and our best wishes for future success.

Huge Cut Effected In Insurance Rate For Washington Hi

CENTERVILLE—A reduction in the fire insurance rate on the entire plant of the Washington Union High School from 72c to 43c was announced at a meeting of the board of trustees held on Tuesday evening.

This substantial reduction with its consequent saving to the taxpayers was effected after an appraisal of condition of the buildings and the hazards presented was found to warrant the lower rate.

The board considered plans for advertising for bids for construction of a Home Economics building, following approval at Washington,, D. C. of a WPA grant of $19,696 to the school, and Principal A. J. Rathbone was requested to proceed with the details of preparing necessary specifications. The trustees adopted the wage scale of the Building Trades Council of Alameda County, which advanced the project another step.

Succeeding Clemens for this time is Ed F. Heuer who has been in charge of work at the Calaveras Dam for the past six months.

Upon announcement of his retirement last November, Ebright was given a testimonial dinner by officials of the water department and was presented wth a radio. Twenty eight employes working under the Sunol office gave him a second banquet last March and presented him with an arm chair for his new home recently completed on the Mission Road.

Ebright started with the Spring Valley Water Company in San Mateo County in the fall of 1887. Chamber Directors To Improve Highway Signs And Underpass

NILES — Directors of the Niles Chamber of Commerce voted to spend an additional $20 on the electric highway sign in order to make it more effective, this action having been taken at a meeting held last Thursday night.

They decided to postpone action on the inhalator suggested by the fire department until next season, as the Summer is well under way and this is not considered an expedient time to collect funds.

The pictorial sign suggested by the Chamber for Niles Canyon met with the hearty approval of picnic ground owners but they did not wish to assist in financing it, accordng to a report by President W. B. Kirk who interviewed them.

The secretary was instructed to write the county road department asking that one of the sidewalks in the underpass by the cannery be removed in order to widen the road. Similar sidewalks have been removed from underpasses on the Niles-Centerville Road.

GRAPE INDUSTRY HAS OPPORTUNITY

The future of California's grape industry, involving approximately a half billion dollar investment, and faced by a huge crop surplus, is in the hands of the growers in 43 counties.

Director R. L. Adams, loaned to the committee bv the University of California, said tentative commitments of federal loans, totaling $14,900,000 to save California's grape, raisin and wine industry from a price collapse this fall have been obtained by a committee of growers and processors after two weeks of negotiations in Washington, D. C.

H. A. Caddow, secretary of the committee, advises that federal funds will be available on condition that growers adopt a California Grape Prorate Program in statewide election scheduled July 28.

If the prorate is adopted and federal financing provided in accordance with the tentative commitments, the Washington committee estimates growers should average not less than $10 per ton net return on their record-breaking crop, forecast at 2,500,000 tons this year.

This would be at least $5 more return per ton than growers could hope to get if the prorate and federal financing program were not carried out; or at least $12,500,000 in benefits for producers would be obtained by adopting the prorate.

The prorate must limit to a maximum of 500,000 tons the amount of grapes delivered for commercial wine production this season, as the definite condition for the federal loan.

The negotiating committee estimates this restriction on commercial crushing will maintain prices paid growers on these 500,000 tons to approximately $15 per ton or better.

It bases this estimate on the fact that commercial crushing was 911,239 tons in 1937, and the 500,000 tons maximum set for 1938 is only a little over half of last year's delivery.

E. F. Loescher, chairman of the state-wide Grape Growers Committee, declares "this result now assures victory for the prorate on July 28."

Newark Merchants Win By Forfeit Then Really Win

By Eugene Pashote

NEWARK—In a close battle, marked by lots of slugging, the Newark Merchants emerged victorious in last Sunday's game with De Lano's Cafe of Hayward. San Leandro defeated Decoto, placing Newark on top in the Southern Alameda County League for the second half.

De Lano's forfeited to Newark before the start of the game as they were short two players. Machado, who filled in at right field hit two home runs over the left field wall. Leroy Naia of Newark played in the left garden for the visitors.

The lead seeesawed back and forth throughout the game, Newark finally winning by a 11 to 10 score.

In addition to Machado's two homers, Henry and Dittman, for the visitors, each hit a circuit clout. For Newark, J. Silva hit for two doubles and a triple in as many tries.

TRACTOR CONCERN ANNOUNCES REDUCED PRICES ON ALL TYPES

Making its most important and boldest forward steps since its introduction of Diesel-powered tractors in 1931, Caterpillar Tractor Co. announced on June 20 liberal price reductions in its line of track-type tractors and Diesel engines.

This, according to Carl E. Danielson, vice president of the Peterson Tractor & Equipment Company, which handles the sales of "Caterpillar" machines in this locality, is the best news that has come to power users in recent years. The reductions in the tractor lines affect all sizes except the Twenty-Two, the price of which had already been reduced $200 several weeks earlier.

The acclaim with which that announcement was received encouraged the company to make similar reductions in the prices of other of its products, the reductions ranging from $150 to $650 on the several sizes of tractors and from $175 to $750 on the Diesel engine line, affecting six of the eight current sizes of "Caterpillar" Diesel Engines.

Since the formation of Caterpillar Tractor Co. in 1925, Danielson explains, it has adhered to the policy of building ever better products at ever lower prices. Prior to the introduction of Diesel engines and Diesel-powered tractors in 1931, repeated downward revision of prices had been made, passing on to users the benefits of increased sales and the consequent economies of larger-scale production.

A FREE GOVERNMENT CANNOT PERISH AS LONG AS WE HAVE A *Free Press*

IN MANY PARTS of the world, democracy is in eclipse. Countries are moving away from free government, from responsible government based on the voluntary consent of the people. In each case the extinction of liberty is preceded by the extinction of a free press. Dictatorship cannot prevail while there survive free newspapers in which the people can voice and print their own opinions and through which every act and policy of the government can be observed, appraised and reported. It is an essential part of democracy that ALL opinions, whether right or wrong, be given a public hearing. Freedom of the press is our strongest guarantee that Americans shall remain a free people. On your newspaper depends your civic safety and the independence of your nation. Protect your newspaper—support it—for its welfare is your welfare—its freedom is your freedom.
